## Is matrix homeserver down?

12

2 months ago by [mrpancakes16](#) +12 / -0

Element says it cannot be reached.

▼ “ Cannot reach homeserver Ensure you have a stable internet connection, or get in touch with the server admin

Logging in from <https://app.element.io/#/login>

About 4 other people have responded to my post and say the same thing

▼ Ok. It's weird. Because I haven't even typed in a user or password. It's like the client can't even reach the server at all.

attribution is a waste of time unless you're a fed

IF it's an attack and not misconfiguration/malfunction

IF you've been doing threat intel for awhile so you have sets of indicators

IF you get who right (but probably not)

What are you going to do with the data?

Last 3 hops:

6 los-edge-07.inet.qwest.net (67.14.102.142) 168.005 ms 168.244 ms 167.675 ms

7 65.153.29.222 (65.153.29.222) 163.759 ms 163.936 ms 163.290 ms

8 be53-13.cr5.lax.multacom.com (208.64.231.86) 163.149 ms 167.691 ms 167.706 ms

without seeing a trace when it was in working order there's a lot of speculation. There could be intermediary infra down or maybe host unreachable, ttl exceeded were always filtered from this hop forward.

SPEZ: Here's the last few hops to an adjacent IP:

4 ae-1-3511.edge2.NewYork6.Level3.net (4.69.209.78) 115.987 ms 115.983 ms 115.952 ms

5 CenturyLink-level3-NewYork6.Level3.net (4.68.70.50) 106.641 ms 106.283 ms 111.229 ms

6 los-edge-07.inet.qwest.net (67.14.102.142) 167.924 ms 167.627 ms 167.991 ms

7 65.153.29.222 (65.153.29.222) 163.393 ms 163.468 ms 163.600 ms

8 be53-13.cr5.lax.multacom.com (208.64.231.86) 162.606 ms 162.983 ms 162.892 ms

9 224-125-74-198-dedicated.multacom.com

Looks like the host is unreachable as adjacent IPs 198.74.125.222 and 198.74.125.224 are reachable but not 198.74.125.223 (matrix.donaldsarmy.us)

[permalink](#) [parent](#) [save](#) [report](#) [block](#) [reply](#)**mrpancakes16** [S] 2 months ago +1 / -0

1

This is really weird. Last hop appears to be a web host company. <https://donaldsarmy.us> still

▲ **Romans12** 2 months ago +1 / -0 🔒

1

▼ donaldsarmy.us resolves to 203.28.246.138 (US - MULTACOM CORPORATION)

matrix.donaldsarmy.us resolves to 198.74.125.223 (APNIC - Australia - <3 based aussies, but why place this all the way over there - it triggers the border/international telecom exemption on 4th amendment)

SPEZ - Transposed hostnames earlier. fixed now.
